

Web Development Internship

UI/UX & Front-End Technologies

Web Development Internship – UI/UX & Front-End Technologies

We are delighted to announce our **collaboration with Kalpataru First Grade Science College, Tiptur**, for conducting a **focused Internship Program on Web Development**, with a special emphasis on UI/UX design and Front-End technologies.

This internship is tailored for **final-year students (6th Semester)** of BCA and BSc, and is scheduled to take place from **May 10th to June 15th, 2025**.

The objective of this internship is to provide students with **hands-on experience** in modern web development practices, enabling them to bridge the gap between academic concepts and real-world applications. Through interactive sessions, mentorship, and practical projects, students will gain a solid foundation in user interface design, user experience strategy, and front-end development tools and techniques.

We believe this initiative will not only enhance the technical competencies and industry readiness of the students but also foster a culture of innovation and collaboration.

We sincerely thank Kalpataru College for its continued support and commitment to student development. We look forward to a successful and enriching internship experience for all participants.

Skill-Building Internship Journey

106+ Student Participation

5 Problem Statement

25+ projects

Problem Statements

Smart Attendance Management System

There is a need for an efficient and automated system to record and manage student or employee attendance, minimizing manual errors and saving time.

Social Impact Platform for Educational Support

Lack of accessible platforms to connect underprivileged students with educational resources and volunteers is a barrier to inclusive learning.

Intelligent Traffic Control System

Urban areas face severe traffic congestion due to the lack of real-time, adaptive traffic management solutions.

Smart Parking Management Application

Drivers often face difficulties finding available parking spots, leading to wasted time, fuel, and increased traffic congestion.

Career Opportunity & Job Matching Platform

Job seekers, especially freshers, struggle to find suitable opportunities that match their skills, due to lack of personalized, real-time job search tools.
